

John,

I received my certificate and stickers today.

I was pleasantly surprised with how much we were able to go over in both the ground school and flight training in just a few short days. I feel much more comfortable in the aircraft now that we actually went up and did real world scenarios and emergency procedures in depth. Using the actual airplane instead of simulators was a lot more fun and obviously much more realistic! Thank you again for the recurrent training I look forward to next year's training.
