

"Taking recurrent training in my PC12 with John increased my knowledge of the aircraft's systems, sharpened and enhanced my instrument skills, and taught me a number of ways to reduce maintenance and enhance reliability and safety. His one-on-one instruction and incredible in-depth knowledge of the PC12 enabled me to home in on those things that I needed to improve the most and to make the most effective use of the training. If you haven't tried John for training, you should! You will be a better PC12 pilot and owner because of it."
